DRAWCHECK

CONSISTENT DRAW, ALWAYS.

“The draw of our joints is part of what sets us apart from our competitors. The perfect draw, every time. The DrawCheck helps us put a very specific measurement to that, and helps improve the consistency of our product.”

CHRIS BECHLER, COO REBEL SPIRIT

DRAWCHECK

Product consistency is critical to the success of any pre-roll line! However, draw consistency, meaning how hard or easy it is to draw air through a joint, is often overlooked.

Thankfully, there's no longer a need to guess or rely on your staff to "alley test" products. The new RollPros DrawCheck gives you a quantifiable measurement to dial in your Blackbird or improve your quality assurance process.

From strain to strain, batch to batch, or facility to facility, make sure the draw on your pre-rolls is correct and consistent.

SPECS:

Height = 135mm
Width = 340mm
Depth = 210mm
Min Supply Pressure = 60PSI
Min Supply Flow Rate = 0.5 CFM
No AC Power Requirements [Air Only]

KEY COMPONENTS AND MATERIALS:

Air Suction Filter (Serviceable)
Magnehelic Differential Pressure Gauge
Ashcroft Supply Pressure Gauge
Parker Watts Air Regulator
Stainless Steel Base
Powder Coated Cover
